

Electrical Apprenticeships

Start your career with one of New Zealand's largest companies and gain a NZ Certificate in Electrical Engineering (Industrial focus) and a full practicing license in our fully funded apprenticeship. You will work in a large manufacturing environment with a supportive team of technical trades professionals while earning a competitive salary. Applications for 2025 can be made from 22 July to 18 August 2024

What can you expect?

- Theory-based learning balanced with practical hands-on training and work experience
- Work on wiring equipment, equipment breakdowns, preventative maintenance, fault diagnostics, maintenance planning and scheduling, shut down maintenance and installations, with exposure to instrumentation and site utilities assets such as boilers
- Learn how to repair and maintain a huge variety of cutting-edge technology including PLC's, highly automated packing and process equipment

What we offer:

- A well-established apprenticeship programme in a world-class environment
- Focus on pastoral care and qualification support
- A 4-year (8000 hour) fixed term contract
- Monday to Friday day roster, 40 hours per week
- A full starting tool kit worth approximately \$3,000
- UniMed Health Insurance
- 5-weeks of paid annual leave
- Coverage of all training related costs during block course including meals, accommodation and travel

Who are we looking for?

- Achieved OR in the process of achieving NCEA Level 2 with Maths and English (all) + Physics (electrical only)
- An interest and aptitude in hands-on engineering work
- A passion to qualify and build a career in your chosen field
- Restricted driver's license (by the time you start the apprenticeship)
- Keen interest in solving problems, a curiosity to learn and being able to work in different situations with different people
- Completion of a pre-trade course in a related subject would be awesome, but not a necessity
- New Zealand citizen, Australian citizen, or Permanent Resident in New Zealand
- 16 + years old
