

# Heavy Automotive Apprenticeships

Start your career with one of New Zealand's largest companies and gain a NZ Certificate in Heavy Automotive Engineering (Diesel/Auto Electrical focus) and your Class 5 License in our fully funded apprenticeship. You will work in a large manufacturing environment with a supportive team of technical trades professionals while earning a competitive salary. Applications for 2025 can be made from 22 July to 18 August 2024

## What can you expect?

- Theory-based learning balanced with practical hands-on training and work experience
- Work on the maintenance and repair of some of our 480 fleet of milk tankers, focusing on computer diagnostics and fault finding, using cutting edge technology and the latest tools and gear
- Learn all things diesel from transmissions to pumps, planning, diagnostics, fault finding and preventative maintenance all to keep our fleet moving

## What we offer:

- A well-established apprenticeship programme in a world-class environment
- Focus on pastoral care and qualification support
- A 4-year (8000 hour) fixed term contract
- Monday to Friday day roster, 40 hours per week
- A full starting tool kit worth approximately \$3,000
- UniMed Health Insurance
- 5-weeks of paid annual leave
- Coverage of all training related costs during block course including meals, accommodation and travel

## Who are we looking for?

- Achieved OR in the process of achieving NCEA Level 2 with Maths and English (all) + Physics (electrical only)
- An interest and aptitude in hands-on engineering work
- A passion to qualify and build a career in your chosen field
- Restricted driver's license (by the time you start the apprenticeship)
- Keen interest in solving problems, a curiosity to learn and being able to work in different situations with different people
- Completion of a pre-trade course in a related subject would be awesome, but not a necessity
- New Zealand citizen, Australian citizen, or Permanent Resident in New Zealand
- 16+ years old
